PROJECTS

WhatsAppening | React, Redux, JavaScript, MaterialUI, Socket.IO, Express, Sequelize

[live](#) | [github](#)

A full stack clone of the popular messaging application, WhatsApp

- Showcased React and Redux proficiency by creating a mobile-friendly, responsive, single-page application
- Integrated AWS S3 for upload capability of user profile and chat room images by creating a dedicated API route that validated user data before needlessly uploading to AWS
- Designed full CRUD functionality for contacts, messages, users, and chat rooms using Redux for optimal user experience
- Implemented live chat functionality between groups of 10+ users by using Socket.IO to create web sockets

SortEd | React, JavaScript, CSS, MaterialUI

[live](#) | [github](#)

A simple, sleek, interactive sorting algorithm visualizer

- Created custom animation function to visualize bubble sort, insertion sort, selection sort, quick sort, and merge sort algorithms
- Designed fully functional theme chooser and ability to customize animation speed and array size to enhance user experience

Discordance | React, Redux, Flask-Socket.IO, Socket.IO, JavaScript, Flask, Python

[live](#) | [github](#)

A full stack clone of Discord, a popular messaging and gaming application

- Collaborated with a small team utilizing Github workflow to work on multiple features simultaneously
- Researched and successfully implemented web sockets in Python to enable live chat within servers
- Mentored team members on React, Redux, and web sockets to ensure a mutual understanding of the code
